

“I did not foresee that the business would get this big. How did I do it? You have to deliver and in order to deliver you have to prove you have capacity. We increased capacity, developed new product all the time and delivered. As a cabinet maker I have the vision how a certain kitchen or cabinet has to look and we have great people to execute on that vision. Did I ever think it would be this big? No! I had to grow and expand the business because there was demand for the product and we had a reputation that we had to maintain. I was lucky that there was opportunity in this area to keep buying adjacent properties to keep expanding. And then you keep on going, keep on doing whatever you have to do, you never stop. You have to have a vision and you also have to have a positive attitude to succeed in business.”
